Heritage Finish Pavers

Heritage series pavers are manufactured to have an antique finish. They go through a special process to give them an aged appearance. This additional manufacturing process adds both texture and charm, but also comes at a higher cost than standard finish pavers.

Adirondak

Bull Nose Paver

Colony Cobble

Adirondak

\$ 4.55/sq. ft.

This captivating paver features the historic combination of square and rectangular modules working in tandem to create a random segmental paving surface. While its unique and distinct cast edge treatment sets this stone apart from its class, Adirondak's textured surface creates the feel of old cobble paving.

Available Colors:
Granite Blend

Layer 10.5 sq ft \$47.78
Pallet 105 sq ft 477.75

Bull Nose Paver

\$ 4.96/lin. ft.

Perfect for the edge of your inground pool, or use it as a tread on steps for a smoother edge.
6" x 12" x 2 3/8"

Available Colors: Antique Gray

Each \$2.48

Colony Cobble

\$ 4.60/sq. ft.

This 4 piece paving system provides a nostalgic appeal for both residential and commercial environments. The tumbled surface expresses an aged and weathered appearance suitable for most high traffic areas. The product's running bond pattern conveys the tradition of colonial architecture and compliments most environments. Running bond only.

Standard Finish Pavers

Standard series pavers have a more crisp "out of the mold" type appearance compared to heritage finish pavers. They do not go through any additional manufacturing processes to add aging type effects making these pavers the most cost effective on the market.

City Stone

City Stone

\$ 4.25/sq. ft.

The CityStone series shares a common architectural look in which texture is defined by the joint pattern. The extensive range of sizes yields unlimited creative control to satisfy your design intent. CityStone's generous chamfers control lippage even in challenging large-format/non-planar installations. The line is available in either **Demi-Combo or Supra-Combo**.

Permeable Products

Permeable surfaces help to preserve our environment and the most precious resource of all, water. We can't live without water, and permeable pavers help protect the quality of our water supplies. They reduce the amount of storm water runoff entering our natural waterways that carry with it contaminants and pollutants. The water is allowed to naturally drain into the surface through the voids in the permeable pavers. This promotes the infiltration of rainwater and also helps to recharge the groundwater.

Eco-Panorama

\$ 3.95/sq ft.

This permeable paver mitigates stormwater flow rates and improves water quality without the need for additional drainage systems. Proven through many years of successful projects, enlarged lugs on the sidewalls of these units create quarter-inch joints which, when filled with a properly-sized aggregate, drain water to the permeable base. This action filters stormwater, reduces peak flow rates, and recharges groundwater sources to create a sustainable pavement option.

Clay Pavers

Clay paving bricks differ from the brick used on walls and chimneys, in that paving bricks are solid, without holes. (See pg.16 for cored brick) In addition, paving bricks are fired to a different standard than face bricks to insure long-term durability. Our clay pavers come in a "flashed" color which means there are a variety of red and brown shades mixed on the pallets.
